

The sky is the limit

## OUR SUPPORT

### 1: EXPLORE

During the **Explore** stage we meet with you and your staff to discuss what aspirational skiing activity you would like to explore. This allows us to identify the next steps we need to begin considering to support you achieving your aspirations.

### 2: PLAN

Once we have agreed the skiing activity you wish to provide your pupils with, we then **Plan** with you, all of the areas associated with providing a safe and enjoyable activity or residential. This includes planning all of the constituent parts of this such as qualifications, funding, risk assessments etc. that must be in place for you to implement the activity safely and successfully.

### 3: IMPLEMENT

This is when you begin to **Implement** the activity you have chosen and the underlying processes. We are on hand during the implementation stage to provide support both in person and remotely, when and where required.

### 4: EVALUATE

Once our support has ended and the process is complete, we **Evaluate** the skiing activity and all its facets in preparation for you leading subsequent skiing activities or residencials independent of our support.

## COST

For schools wishing to provide an aspirational skiing activity, our initial **Explore** stage and consultation is free. If you decide to pursue the next steps of **Plan, Implement** and **Evaluate** with us then we charge a daily rate for this consultation.

This is £400 per day (1 day=8 hours). This includes any work we do in collaboration or on behalf of you and your school and does not include travel or expenses.

If you would like to know more, please contact us directly via email [info@senski.uk](mailto:info@senski.uk)
